TO WHOM IT MAY CONCERN

The in-house simulation test of heat transferring in compare with SHERA FLOOR PLANK vs HARD WOOD has been conducted.

The Heat Transferring behavior is illustrated as below.

The specimens are characterized their temperature gradients under following simulation details

- 1) Expose to a controlled light intensity of 12 hours
- 2) Expose without light and any impacts from external factors for another 12 hours

- A) Surface temperature during 12 hours exposing to intensity light of SHERA floor plank (wood color) was presented the lowest temperature in specific timewhen comparing with Hard wood
- B) After 12 hours, in the specific time, SHERA floor plank (wood color) has lowest surface temperature
